Swiss made:
Swiss quality is worth it!

Since 1872, Giroflex has been working in Switzerland, in Koblenz, with the highest standards of ergonomics, comfort and design. This will remain so in future too. Because the concentration of the core competencies with qualified staff in one place is worth it for you. Here, with a great deal of work done by hand together with state-of-the-art manufacturing technologies, first class chairs and armchairs are made that are in daily use worldwide and support their owners with the greatest possible comfort.

5-year guarantee: Giroflex provides a 5-year full warranty on its quality products covering construction, mechanism and workmanship.

Services: We clean, repair and maintain office chairs on your premises or ours, analyse your seating furniture, advise you free of charge and ecologically dispose of office chairs of all brands.

Ecology and sustainability:
giroflex 68 has room for both.

Anyone who works sitting down should be able to have the confidence that his or her chair is in top shape ecologically too. This is one of the reasons sustainability has been a part of everything we do at Giroflex for decades and is constantly being expanded.

Many steps, clear goals: a tradition of ecology. Mono-material separation, the first almost 100 per cent recyclable model ranges in Europe (giroflex32 and 33) and the environmental standard ISO 14001 – Giroflex has been a pioneer in office ecology since the 1980s. New facilities and targeted measures have resulted in massive savings in CO₂, water and electricity. Short distances need less fuel: nearly everything is produced in-house or nearby. In addition, Giroflex disposes of office chairs properly and also rigorously checks its suppliers.
